**WORKERS' COMPENSATION MEDICAL FEE SCHEDULE FOR PHYSICIANS  
SUMMARY OF INCORPORATED MATERIAL  
FILED WITH LRC SEPTEMBER 15, 2010**

**1. 2010 Workers' Compensation Medical Fee Schedule for Physicians  
(September 15, 2010)**

Pursuant to KRS 342.035(1), the commissioner of the Department of Workers' Claims is to promulgate administrative regulations to keep fees and charges and reimbursements for medical services limited to charges that are fair, current, and reasonable for similar treatment of injured persons in the same community for like services, where treatment is paid for by general health insurers. The commissioner is required pursuant to KRS 342.035(4) to promulgate administrative regulations establishing the workers' compensation medical fee schedule. The current 2010 medical fee schedule for physicians is based on the previous fee schedule completed in 2008. The CPT codes were updated to 2010 standards. The values were changed to reflect a level of reimbursement for all services listed in the fee schedule to comply with the requirements of KRS 342.035. Fees are to be at the same level as treatment paid for by general health insurers. Reimbursement amounts were increased and/or decreased to meet commercial levels. Of the eight service areas, three showed an increase in their conversion factors while the other five demonstrated a decrease. Those services areas with increases are Anesthesia, General Medicine and Radiology. Those services demonstrating some decreases are HCPCS, General Medicine, Physical Medicine, Pathology and Surgery. The most significant increase was in the

service area of Anesthesia. While the conversion factor only changed from the 60<sup>th</sup> to 65<sup>th</sup> percentile, there was a large increase in the conversion factors from 36.22 to 61.37. This conversion factor increase was attributed to the limited amount of data available to Ingenix in 2008. For example, their data in 2008 was based on a 681 frequency of use in the Workers' Compensation arena compared to a 9,359 frequency use in 2010.

Twenty-two CPT codes with 1,000 or more frequencies in the Physical Medicine service area will remain consistent with the 2008 fee schedule. The other 42 codes will decrease based upon proposed changes from the 90<sup>th</sup> to the 85<sup>th</sup> percentile. The conversion factor in 2008 was 53.73 and has been changed to 43.95.

Code 99211 located in the Evaluation and Management Section will remain consistent with the 2008 Fee Schedule.

The surgery codes with 1,000 or more frequencies (45 decreases and 161 increases) will remain consistent with the 2008 fee schedule unless they have been designated as By Report (BR). Those codes designated as BR will be paid accordingly.

Other significant changes include updates to the transportation fees to reflect the Medicare transportation fees plus 130% and instructions on determining urban, rural, or super rural routes. By Report billing procedures were established for eyeglasses, hearing aides, contact lenses and items custom made. Reimbursement methods for durable medical equipment were clarified. The billing methods for the Certified Registered Nurse Assistant (CRNA) and Anesthesiologist were clarified. We updated

each section of the fee schedule to include the modifiers. These are the significant changes to the fee schedule completed in 2010.
